Of this number sty-nine were discharged recovered, much improved, five removed by reads unimproved, and twenty died ring a remainder of four hundred and hen-two hundred and twenty-six males one hundred and eighty-nine females. he colored insane—seven males and ten smales - are included in this calculation. he highest number in the Hospital at one during the year was four hundred ad nineteen, and the lowest four hunked and nine; daily average four huneed and thirteen and one-half. The cost week for keeping each patient was two diam and twenty-two and four-fifth cents. is covers all exprenses for salaries and had beat, and, indeed, everything that es into the running of the institution unide of repairs. This is certainly a very Forable statement, and is about 151 cents ss precipite than it was last year, which in a measure due, doubtless, to the deecation in the prices of flour, meats, poceries and other provisions.

There have been under treatment since e beginning of the Hospital nine hunded and forty one patients, five hundred d nineteen males and four hundred and enty-two females, of whom two hundad and twenty-five, one hundred and six en males and I hundred and nine females, tre been discharged recovered, making a this of 23 91 on the whole number. for the past year the per cent. of recover es on admissions is 50 88. Taking into ideration the fact that at least threethis of those admitted were regarded as actuable, by reason of the duration of their insanity, this result may be viewed a quite favorable if not flattering.

ENGLAND.

THE GLASGOW BANK FAILURE—OFFICIAL REPORT OF THE INVESTIGATION.

LONDON, October 15.—The report of the investigation into the affairs of the City of Glasgow Bank, just issued, is worse than the most gloomy forebodings. The loss shown in the balance sheet is £5,190,983. This loss, with the addition of £1,000,000 capital, the shareholders will have to make good. The report shows the practice of a systematic deception. Thus, since the commencement of the year, the weekly returns of the amount of bullion on hand which the bank was obliged to make to the government so us to show that its funds were maintained in due proportion to its note issue have been satisfied by adding thereto imaginary sums varying from £80,800 to imaginary sums varying from £20,000 to £300,000. The directors reports to the stockholders also overstated amounts of securities and bullion held in reserve by the understated loans they granted by £1,136,764. The directors furthermore have been in the habit of treating on the balance sheets £7,345,357 of bad debts, over half of which is due by four debtors as an available assets. The principal assets of the bank are the bonds and shares of the Western Union Railway of the United States and the scrip of the New Zealand and Austrian Land Company, the value of which is estimated at £358,450 and £974,045 respectively. Crowds were assembled before the Bank and Exchange awaiting the report, which caused consternation. A call for £5,000 per share is anticipated, which it is thought half the stockholders will be unable to meet. The remainder of the stockholders will thus ultimately be compelled to pay double.
